SoftSkills Assignment module - 3

Question-1: Describe a key project you have worked on or are currently working on.

This website is for a medicine manufacturing company. The website provides information about company which manufacturers medicine. there is information about investors on the website more over, some one can find defferent medicine can the website. it is static website but everyone can find all related information on this website. Any investors can create his account this website. Currently I am designing a gaming website. Any user can register by visiting this website. And can play the game, the user wins points by playing this game and by converting the won points into money, he can withdraw that money in his bank account.

Quetion-2: Explain the technologies used, the scope of the project, and its objectives.

In designing this website I have used technologies like html, css, javascript, jquery and css framework bootstrap. The scope of this website is to provide drug information to the user for health purposes. This project is designed to provide the right information to any user. This website shows the company profile for the user so that the user can get information about the company. Which is the objective point of this website.

Question-3:- Highlight the challenges faced and how you addressed them, showcasing your problem solving skills.

The first problem I encountered in my medicine website was in the home page. Which i wanted to create a photo clip Parth of the home page. I had to design it myself. I faced that problem first time and I did that problem solution in my own way. I have faced so many problems to include my website description myself through google and youtube. In this website I have used a website called code pen through javascript, jquery code that I have faced so many problems to link with my code, but I have tried to solve that problem by facing it.
